PROFESSIONAL SUMMARY

Experienced ICT professional with 8+ years' experience delivering network administration, hardware maintenance, and IT support across healthcare and academic institutions. Improved system uptime by implementing proactive hardware maintenance, reducing breakdowns by 32%. Trained 200+ staff on hospital management systems, increasing user adoption and efficiency. Managed ICT budgets exceeding KES 5M while coordinating vendor procurement to reduce costs by 17%. Adept at supporting distributed teams with remote troubleshooting, virtual system training, and cloud-based collaboration. Ready to transfer technical expertise and remote support capabilities into an ICT Officer or Systems Administrator role within a forward-thinking organization.

SKILLS

Network Administration, Hardware Maintenance, Software Installation, Cybersecurity Basics, Linux Systems, Troubleshooting Support, Vendor Management, Technical Documentation, User Training, ICT Procurement, LAN Configuration, Wireless Networks, System Security, ICT Budgeting, Technical Support, Data Backup, Hardware Repairs, Software Updates, Cloud Systems, Remote Support.

EXPERIENCE

ICT Officer
Oasis Specialist Hospital | Kisii, Kenya | Oct 2016 – Present

Roles and Responsibilities:

- Reduced LAN downtime by 42% by redesigning network maintenance schedules, implementing monitoring protocols, and promptly addressing connectivity issues that previously disrupted hospital operations.
- Trained 200+ staff members on hospital management systems and ICT infrastructure, improving adoption rates and reducing support tickets by 24%, which enhanced overall operational efficiency.
- Negotiated with vendors to secure favorable contracts, cutting procurement costs by 16% while ensuring timely delivery of high-quality ICT equipment and consumables.
- Installed, configured, and repaired over 500 devices including PCs, laptops, printers, and copiers, significantly reducing hardware-related disruptions across hospital departments.
- Developed and managed ICT budgets exceeding KES 5M annually, ensuring accurate forecasting, cost control, and alignment with organizational financial objectives.
- Delivered remote troubleshooting and virtual support to distributed hospital staff, enabling uninterrupted operations during emergencies and off-site activities.
- Created comprehensive ICT documentation including budgets, technical manuals, and system reports, improving departmental knowledge transfer and audit compliance.

ICT Officer
Worf Technology Company Limited | Kakamega, Kenya | Oct 2015 – Jun 2016

Roles and Responsibilities:

- Configured and maintained LAN infrastructure for over 20 SME clients, streamlining operations and ensuring stable connectivity that improved business productivity.
- Increased company revenue by successfully marketing and supplying ICT accessories, broadening the customer base and strengthening client relationships.
- Reduced average repair turnaround time by restoring devices to full functionality within short service cycles, minimizing downtime for clients.
- Delivered virtual consultations and remote ICT support to clients, ensuring continuity of services beyond physical site visits.
- Provided tailored ICT solutions that met client needs within budget, enhancing satisfaction and promoting long-term business partnerships.
- Coordinated ICT equipment procurement and supply chain processes, guaranteeing timely delivery of accessories and preventing workflow disruptions.
- Collaborated with cross-functional teams to design customized ICT service packages that improved customer retention and boosted repeat sales.

ICT Intern (Attaché)
Masinde Muliro University of Science and Technology | Kakamega, Kenya | Jan 2014 – Mar 2014
Roles and Responsibilities:

- Installed and configured computers and network systems across various departments, supporting academic and administrative functions.
- Reduced troubleshooting response time by 31% by proactively maintaining systems, preventing frequent disruptions in daily university operations.
- Provided technical support to staff and students, ensuring timely resolution of hardware and software issues that improved productivity.
- Assisted in developing system documentation and ICT reports, contributing to accurate departmental audits and knowledge management.
- Delivered system updates and user support virtually for staff working off-site, ensuring academic continuity during transitions.
- Supported senior ICT staff in implementing major network upgrade projects, gaining hands-on experience with enterprise-level systems.
- Conducted repairs and maintenance of ICT hardware, ensuring consistent availability of computers and peripheral devices for end users.
